DETAILED ACTION

Drawings

The drawings are objected to under 37 CFR 1.83(a) because they fail to show "the pump 90" as described in the specification. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2,5,12,16,20 & 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Drake (5,035,117). Drake discloses a thermal engine driven refrigeration system and comprising: a spark ignited internal combustion engine (14) having a shaft coupled to an air compressor (24) and refrigeration systems (26,28) and moreover carbon dioxide is removed from inert gas and cooled, filtered and refrigerated or stored (see column 2, lines 15-25).

Allowable Subject Matter

Claims 13-15 are allowed over the prior art of record.

Claims 3,4,6-11,14,15,17-19 & 21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
